

HPD UNIQUE IDENTIFIER: 136587784192

CLASSIFICATION: 08 80 00 Glazing

PRODUCT DESCRIPTION: Monolithic Glass (Float, Textured and Etched): Monolithic glass is glass in its most basic form; it is simply a single sheet of glass. The glass is available in regular, low-iron, and tinted. Low-iron glass is produced with a minimal amount of iron, reducing the greenish tint and improving light transmission. Tinted glass, also called colored glass, is made by adding mineral oxides during the float glass process to create different colors. Glass is available as standard annealed or safety tempered; annealed glass is glass in its basic form that breaks into jagged pieces, while tempered glass is approximately four times stronger and breaks into small dice-sized pieces. One fabrication option is to back-paint the back surface of the glass. Back-painted glass most often utilizes low-iron glass for the most accurate color, and most times it is in monolithic form, though it can be laminated. Another fabrication option is digital printing ceramic inks onto the glass surface producing high-resolution graphics and images. The ceramic ink is then fused directly into the glass surface through the tempering process, creating a permanent image that never fades. Digitally printed glass is usually in monolithic form, though it can be laminated.

CONTENT IN DESCENDING ORDER OF QUANTITY

Summary of product contents and results from screening individual chemical substances against HPD Priority Hazard Lists and the GreenScreen for Safer Chemicals®. The HPD does not assess whether using or handling this product will expose individuals to its chemical substances or any health risk. Refer to Section 2 for further details.

INVENTORY AND SCREENING NOTES:

This Health Product Declaration (HPD) was completed in accordance with the HPD Standard version 2.3, and discloses hazards associated with all substances present at or above 1000 parts per million (ppm) in the finished product, along with the role and percent weight for each substance. Substances not "Identified" are those considered proprietary to suppliers, and thus are "Undisclosed" on this HPD. The variation in content is due to varying proportions of materials in substances due to the same product being available in different sizes and options: Monolithic Glass (Float, Textured and Etch) in 3mm to 12mm thickness, with optional back-painted and/or digital-printed.

Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard
