WOMEN

PROJECT SPOTLIGHT

KANSAS CITY INTERNATIONAL AIRPORT

Colorful glass from Bendheim greets travelers throughout a brand new terminal at the Kansas City International Airport. Vibrant back-painted glass helps color code the bathrooms throughout the terminal, with blue for men's rooms, yellow for women's rooms, and green for gender-neutral rooms. The glass is installed with Bendheim's Z-KISS concealed glass attachment system, a fully-engineered alternative to traditional Z-clip systems.

Additionally, elegant mirrored glass by Bendheim adorns the elevators throughout the terminal. The frameless aesthetic of the Z-KISS system in combination with the warm hue of the glass creates a sleek and modern appearance.

Bendheim's Design Assist facilitated the ease of installation, reducing lead times and costs, delivering the project on time.
