Product description:

Decorative laminated glass to glass or laminated glass to mirror safety products that contain one or more sheets of glass or one sheet of glass and one sheet of mirror permanently bonded with an interlayer (PVB or EVA). A safety glass; if broken, remains in place, held together by the interlayer at its core. The glass is available as standard annealed, heat-strengthened or safety tempered. Annealed glass is glass in its basic form that breaks into jagged pieces, while tempered glass is approximately four times stronger and breaks into small, dice-sized pieces. The mirror is available as standard annealed. Laminated decorative glass and mirrors contain a variety of decorative specialty interlayers including color filters, fabrics, metal meshes, graphic films, chicken wire, and fiber.

About Bendheim:

Bendheim is one of the world’s foremost resources for specialty glass and glass systems, offering building and design professionals the finest decorative glass options for commercial and residential building use. Decorative laminated, etched, textured, back-painted, digitally printed, and silvered glass varieties are all primary offerings from the company, available with nearly unlimited customization options. Bendheim is also the exclusive distributor of Lamberts channel glass in North America. Channel glass is a specialty architectural glass for interior and exterior wall applications, distinguishable by its linear U-shape. The channel glass planks, standing as tall as 23 feet, contain a high percentage of recycled glass and is produced in Europe’s first environmentally sensitive oxygen-fired cast glass furnace.

Decorative Laminated Glass & Mirrors’ contribution to Green Building Certificates.

Material Sustainability Attributes	Category Impact & What it Covers	Decorative Laminated Glass & Mirrors’ contribution to LEED v4/v4.1 & References	Other Certifications (direct and indirect support)
Environmental Product Declaration (EPD)	<i>Environmental Impact</i> An Environmental Product Declaration (EPD) is a standardized document that communicates the environmental impact of a product over its life cycle. It is based on Life Cycle Assessment (LCA) and follows international standards such as ISO 14025 and ISO 21930.	<i>Materials and Resources (MR)</i> Decorative Laminated Glass & Mirrors EPD is a Product-specific Type III EPD – Products with third-party certification (Type III), including external verification and external critical review, valued as 1.5 products for credit achievement calculation and contributes to option 1 (1 point). Environmental Product Declarations U.S. Green Building Council	WELL, BREEAM, Living Building Challenge (LBC), Green Star
Health Product Declaration (HPD)	<i>Health & Ingredient Transparency</i> A Health Product Declaration (HPD) is a standardized report that discloses the material contents of a product and any associated health hazards. Channel Glass HPD threshold disclosure is 1,000 ppm (0.1%).	<i>Materials and Resources (MR)</i> Decorative Laminated Glass & Mirrors HPD is a third-party prepared HPD. It is worth 1 product for credit achievement calculation and contributes to option 1 (1 point). Material Ingredients U.S. Green Building Council	WELL, Living Building Challenge (LBC), Green Globes
Recycled Content	<i>Material Sustainability Attribute</i> A Recycled Content Certificate is a formal declaration issued by a manufacturer or by a third-party certifier that verifies the percentage of pre- and post-consumer content in the product.	<i>Materials and Resources (MR)</i> Decorative Laminated Glass & Mirrors have a third-party verified Recycled Content Certificate and can contribute up to 2 possible points. Sourcing of Raw Materials U.S. Green Building Council	BREEAM, Green Star, Living Building Challenge (LBC), Green Globes
Low-Emitting Materials	<i>Indoor Air Quality</i> Low-Emitting Materials are products designed to minimize the release of volatile organic compounds VOCs into the indoor environment. Glass is considered an inherently non-emitting source of VOCs.	<i>Indoor Environmental Quality</i> Glass is an inherently non-emitting source of VOCs and can contribute up to 3 possible points. Low-Emitting Materials U.S. Green Building Council	WELL, Living Building Challenge (LBC), BREEAM, Green Globes
JUST Label	<i>Social Equity & Organizational Transparency</i> The JUST Label is a voluntary disclosure tool that measures an organization's performance in six key categories: diversity, equity, safety, worker benefits, local benefits, and stewardship.	<i>Social Equity within the Supply Chain</i> Bendheim JUST Label can contribute up to 1 possible point. Social Equity within the Supply Chain U.S. Green Building Council	WELL, Living Building Challenge (LBC)
