Product description:

Bendheim's TurnKey™ glass cladding system is a quick-assembly wall cladding system for interiors. The patented TurnKey™ clip-in system is a budget-friendly solution for opaque & translucent backlit walls alike. The TurnKey™ system is ideal for back-lit walls, columns, and ceilings. The mechanical, reversible attachment system eliminates the use of adhesives and glass drilling. Adjustable in the field, the system allows speedy & easy installation. Glass panels can be replaced in minutes to easily access lighting and mechanical systems behind the cladding.

About Bendheim:

Bendheim is one of the world's foremost resources for specialty glass and glass systems, offering building and design professionals the finest decorative glass options for commercial and residential building use. Decorative laminated, etched, textured, back-painted, digitally printed, and silvered glass varieties are all primary offerings from the company, available with nearly unlimited customization options. Bendheim is also the exclusive distributor of Lamberts channel glass in North America. Channel glass is a specialty architectural glass for interior and exterior wall applications, distinguishable by its linear U-shape. The channel glass planks, standing as tall as 23 feet, contain a high percentage of recycled glass and is produced in Europe's first environmentally sensitive oxygen-fired cast glass furnace.
